

FGC celebrates the 3rd Smart Train Day at the BcnRail 2015 fair

- **The fair, to be held from 17th to 19th November 2015, is to include the next Smart Train Day, focusing on the concept of smart mobility applied to the rail sector.**

Barcelona, 30th September 2014

Ferrocarrils de la Generalitat de Catalunya is to play its part in the 3rd Smart Train Day as part of BcnRail, the international railway industry fair at Fira de Barcelona, organised in cooperation with the Railgrup cluster, to be held from 17th to 19th November 2015.

This year once again the event, set up in 2013 by FGC, will explore the Smart Train concept in depth, debating topics linked to smart railway management through the use of technology and innovation to improve efficiency and sustainability in the region.

This third event will revolve around the Smart Mobility concept applied to the rail environment, dealing with key issues like efficiency and quality of service in transport through the application of the latest technological advances. Attendees will be able to find out about the latest innovations and experiences in this field thanks to the participation of recognised Spanish and international experts from different railway companies and institutions.

The holding of FGC Smart Train Day as part of BcnRail coincides with the fifth edition of the Smart City Expo World Congress. This makes the event an essential date in the field of sustainable mobility and the railway industry.
